

# **Development of Novel Water-Gas-Shift Membrane Reactor for H<sub>2</sub> Enhancement**

**W.S. Winston Ho, Professor  
University of Kentucky**

**Department of Chemical and Materials Engineering  
Center for Applied Energy Research  
177 Anderson Hall, Lexington, KY 40506-0046  
Phone: 859-257-4815; Fax: 859-323-1929  
E-mail: [wsho@engr.uky.edu](mailto:wsho@engr.uky.edu)**

- Project Duration: 10/1/01 – 9/30/04**
- Total Estimated Funding: \$892,700**

# **Technical Goals/Objectives of Project**

- **Use CO<sub>2</sub>-Selective Membrane to Enhance Water Gas Shift (WGS) Reaction**
- **Develop Novel CO<sub>2</sub>-Selective WGS Membrane Reactor**
  - **H<sub>2</sub> Enhancement via CO<sub>2</sub> Removal**
  - **CO Elimination to 10 ppm or Lower**
- **Deliverable: WGS Membrane Reactor for a 50 kW Fuel Cell (9/04)**

# **On-Board/Off-Board Purification of Reformed Gas with Membrane**

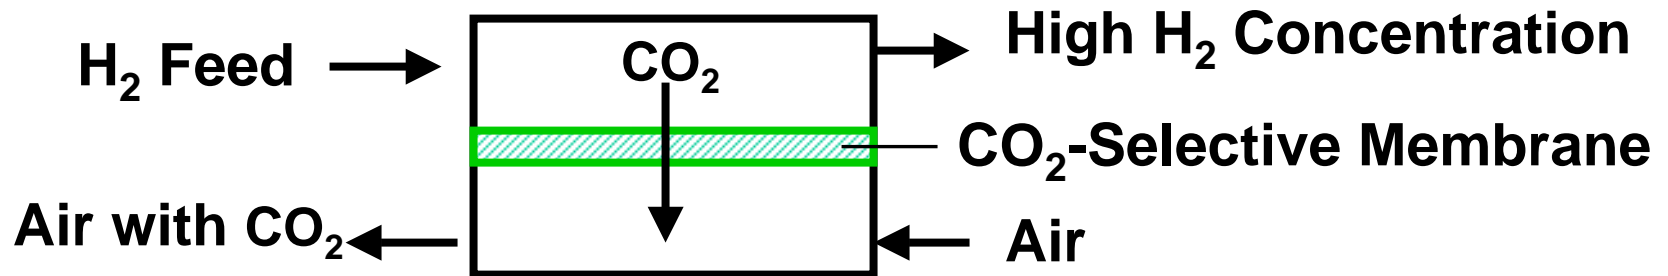

- **Light Weight**
- **Compact – Membrane Module**
- **Simple Operation**
  - **Pressure Differential**
  - **No Moving Parts**

# Novel Membrane Process for H<sub>2</sub> Purification

- **Conventional / Commercial Membrane Process**

- **Novel Membrane Process**

- High-purity H<sub>2</sub> Recovered at High Pressure
- High-purity H<sub>2</sub> Product without CO<sub>2</sub> Desirable
  - + CO<sub>2</sub> acts as diluent / produces CO via reverse WGS reaction
- High H<sub>2</sub> Purity/Recovery via High Driving Force from Air Sweep
- Minimal Parasitic Power Required for Air Blown Separation

# CO<sub>2</sub>-Selective Membranes by Incorporating Amines in Polymer Networks ... Facilitated Transport

Example: Polyvinylalcohol-Containing Amine Membrane

# Fuel-Cell Fuel Processing with CO<sub>2</sub>-Selective Membranes

- Low Temperature CO<sub>2</sub>-Selective Membrane

- High Temperature CO<sub>2</sub>-Selective Membrane

# **Summary of Work Plan**

- **Phase 1 Tasks (10/1/01 –9/30/02)**
  - **Modeling Study / Technical Analysis**
  - **Economic Analysis / Benefits-Risk Assessment**
  - **Development of Novel Membrane**
  - **Characterization of Novel Membranes**
- **Phase 2 Tasks (10/1/02 –9/30/03)**
  - **Set-up of Membrane Reactor Apparatus**
  - **Membrane Fabrication for Reactor**
  - **Proof-of-Concept Demonstration**
  - **Use and Verification/Refining of Model**
  - **Design of Prototype Membrane Reactor**
- **Phase 3 Tasks (10/1/03 –9/30/04)**
  - **Set-up of Prototype Membrane Reactor**
  - **Fabrication of Prototype Membrane Module**
  - **Prototype Membrane Reactor Demonstration**

# Project Schedule

[illegible]

# **Success for the Project**

- **Technical Goals/Objectives Achieved**
- **Novel CO<sub>2</sub>-Selective WGS Membrane Reactor Developed**
  - **H<sub>2</sub> Enhancement via CO<sub>2</sub> Removal**
  - **CO Elimination to 10 ppm or Lower**
- **Deliverable: WGS Membrane Reactor for a 50 kW Fuel Cell (9/04)**
